## **Standard Operating Procedure**

### **1. Purpose**

The Environmental Committee is a standing committee covering the aims of the Federation in area of promotion of safety, health, environment and security in the field of explosives technology and fostering of the image of the profession as well as good relations and cooperation with related associations. The Council establishes standing committees. The committee members appoint a Chairman that reports regularly to the Board. The Committee reports to the Board on daily matters. The standing committees are in principle open to members.

### **2. Scope**

EFEE will distribute to its members available information on incidents and accidents with a view to improvements as well as information about different vibrations and air blast standards valid in National Members. EFEE supports reliability, competence, due consideration of ethical and environmental aspects related to use of explosives. EFEE will emphasize on such aspects in its deliberations.

### **3. Deliverables**

- Incidents and accidents reports.
- List of different vibrations and air blast standards or other related standards valid in National Members.

### **4. Responsibilities**

#### **Chairman of Environmental Committee is responsible for:**

1. Preparation of the list of different vibrations and air blast standards or other related standards valid in National Members.
2. Preparation of incidents and accidents reports related to blasting.
4. Elaboration of Call for Committee meeting with specification of time, place of meeting and draft of agenda and distributing it all Committee members.
5. Elaboration of minutes from Committee meeting and distributing it to all Committee members.

#### **Members of Environmental Committee are responsible for:**
